## LOGIC Systems Engineering

Logic Systems Engineering, launched in 1989, was one of the first companies to introduce a methodology for integrating shipping systems with accounting systems. Today, we are recognized as a leading expert and reseller of shipping solutions software, adding value by providing consulting, integration and implementation services. With over 28 years of experience in implementing over 4,000 shipping systems objects, Logic Systems has demonstrated proven experience and competence in the design and integration of software based solutions for clients to save money in their shipping, warehouse and mailroom.

What We Do

Choosing the right shipping solution is a key strategic decision for any company. Logic Systems works hand-in-hand with customers to review their business requirements to determine the best solution whether they require a global enterprise shipping solution or a desktop shipping solution. All of our shipping solutions offer multi-carrier shipping compliance capabilities and provide customers with the ability to ship, rate, review shipping data and much more. We implement shipping solutions across the globe and offer direct single source services.

Experienced Professionals

Logic Systems Engineering's professional sales staff offers three decades of experience working with more than 10,000 organizations. With a rich history of working with UPS, FedEx, US Postal Service, DHL, and Less than Truckload (LTL) companies, our experience, education and training provide us with the wisdom to share industry best practices. We build solutions by conducting a thorough analysis of present shipping methods, determining current and future requirements and providing a bottom-line ROI for decision making.

Logic Systems' engineers have experience in a broad range of manufacturing and distribution applications including those that involve weighing, bar coding, labeling, internet, small parcel and LTL carriers, bills of lading, reports and hundreds of customized solutions. Our engineers excel in host systems integration and have successfully implemented solutions with virtually every available platform, database, ERP, WMS, and accounting systems including:

- *SAP*
- *JD Edwards*
- *Microsoft DAX*
- *Navision*
- *Profit 21*
- *Noble House*
- *Ecometry and many more*

- *BaaN*
- *SBT*
- *MAS 90*
- *Peachtree*
- *Real World*
- *QuickBooks*

- *Oracle*
- *Great Plains*
- *Macola*
- *FACTS*
- *Epicor*
- *Business Works*

Engineering Excellence Award

2009 marks Logic System Engineering's 20th Anniversary in helping clients save money in their shipping operations & increase productivity in the warehouse. Recognized recently for its distinguished achievements in engineering excellence, Logic Systems was presented with the Engineering Excellence Award. In a letter received from Tracer Research, Inc., Robert Malley, Chief Executive Officer said,

"Considering the breadth and depth of talent within our growing community of resellers, your accomplishment is really quite extraordinary. What is especially noteworthy is the manner in which your organization has evolved and prospered. Your reputation for technical excellence and total commitment to customer service is an important example for everyone interested in raising the level of professionalism in the systems integration business. You have been an important voice in our industry."

Certified Premier Systems Integrator

Logic Systems is a Kewill Certified Solution Provider (CSP's), one of the nation's premier integrators of Kewill Global Enterprise multi-carrier shipping automation solutions. As a Kewill CSP, we are authorized to resell the full portfolio of Kewill shipping compliance software solutions in the U.S. and develop value-added software applications and related services. Compliant carriers include UPS, FedEx, US Post Office, and DHL.

Recognized Microsoft Expert

Our award from Chairman Bill Gates reads *"In recognition of demonstrated expertise and commitment to providing outstanding business solutions based on Microsoft products. Your commitment to knowledge, innovation, excellence and customer focus is improving the world with technology every day."*

Certified FedEx Integrator

LOGIC Systems Engineering was one of only four companies selected and certified by FedEx to be an authorized integrator of FedEx technology to help build unique solutions for customers.
